

Providing Psychological, Social Support and Counseling Services for the Visually Impaired

Goal

This service aims to provide support services for the visually impaired, assisting them in resolving daily life issues or difficulties, and offering community resources or improvement suggestions to meet their needs.

Services are primarily provided to visually impaired individuals in need of psychosocial support, emotional support, and counseling.

Eligibility

After a visual assessment by our optometrist, patients could be referred to our social worker for support and counseling if a significant level of visual impairment is found.

Please contact the optometrist during the consultation if you have any questions.
