About us

Introduction

In May 2001, the Asia Pacific Regional Low Vision Workshop, hosted by the HKSB and sponsored by the International Agency for the Prevention of Blindness and World Health Organization (WHO), recommended to set up a regional low vision clearinghouse to collectively develop and purchase low vision devices and assessment materials at low prices, in order to benefit more visually impaired people, especially in developing countries.

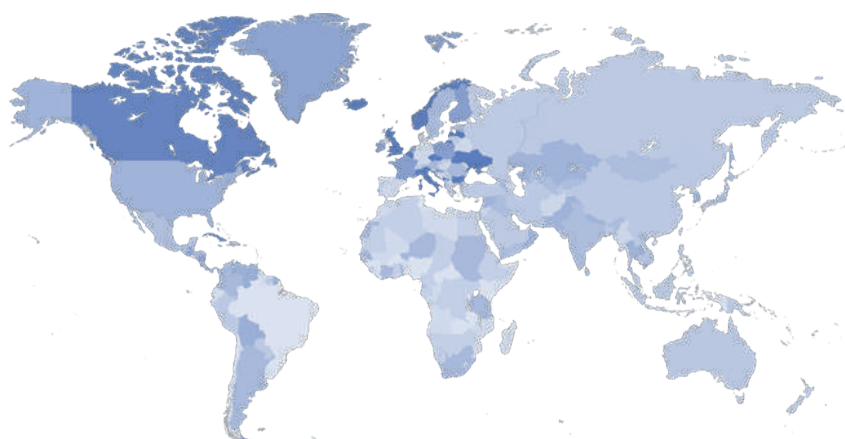

The Vision 2020 Low Vision Resource Centre was therefore established in July 2003 within the headquarters of the HKSB. The Centre was sponsored by the Christian Blind Mission, the Dark & Light Blind Care, and the Sightsavers International. Managed by the HKSB while being monitored by a trusted committee that included representatives from the WHO. The centre aims to expedite establishment of low vision clinics and stimulate accessibility of low vision services for visual impaired by offering high-quality equipment and device at lower cost for developing countries.

Services

The Low Vision Resource Centre provides high-quality low vision devices at affordable price so that the per capita cost of low vision services is minimized. Strict quality control is implemented to ensure the vision impaired in developing countries actually benefit from these low vision devices.

The Centre is a non-profit making project, all income will be contributed to further development of the Centre.

- Power Source : AC
- To assess central retinal integrity in the context of the degree and characteristics of visual functions

US\$ 146.00

Indirect Ophthalmoscope - Rechargeable

YZ25B

- Observation Angle $45^{\circ} \pm 5^{\circ}$
- Adjustable Pupil Distance 52mm - 74mm
- Using 6V/10W Halogen Bulb
- To assess peripheral retinal integrity binocularly in the context of the degree and characteristics of visual functions

US\$ 820.00

Perkins Tonometer

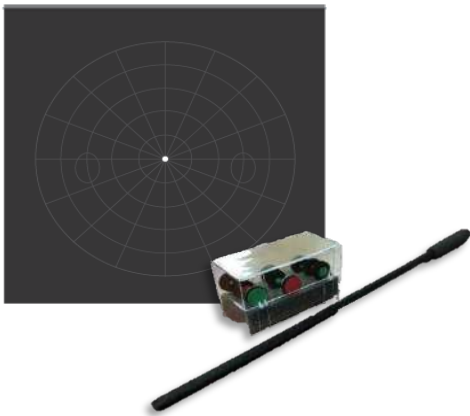

580600

- Portable Hand Held Applanation Tonometer
- Includes battery charger and one reusable prism
- To determine intraocular pressure

US\$ 2244.00

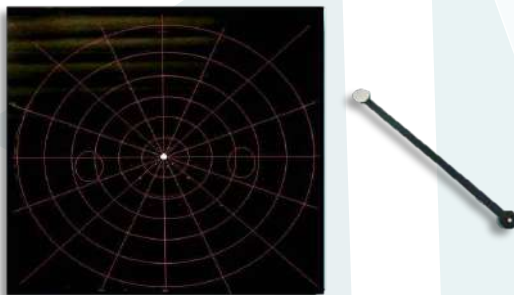

Visual Fields Assessment Equipment

Tangent Screen - 1m 15 deg (GOOD-LITE) 585500

- Screen measures: 44" x 44" (1.1 m x 1.1 m)
- Provides a very accurate of charting the central and Para-central field of vision
- Made of black felt
- To assess and quantify peripheral visual field size
- Testing Object and Tangent Screen Wand Included

US\$ 296.00

Non Standard Tangent Screen (LVRC) TS2

- Testing Distance: 50 cm and 100 cm
- Screen measures: 1.30 m x 1.24 m
- Made of plastic
- Tangent Screens print on both sides
- To assess and quantify peripheral visual field size

US\$ 88.00
